

# POLYFLOAT™ 7011

## Application

- Collector that is effective for many sulfide flotation plants
- Can be used in conjunction with other collectors
- Nearly water soluble with good distribution in the flotation cell, easily stage added as a secondary collector
- Dosages range from 4 to 120 grams/ton of processed ore

## TECHNICAL DATA SHEET

## Benefits

- Commonly used to increase recovery of Cu, Mo, Ag, and Au
- Currently being used as the Moly collector at a major mine in the U.S.
- Used in a high pH flotation scheme
- Basic sulfide ore collector
- Can be used with other collectors

## Properties

Appearance

Clear, pale-yellow to red-brown liquid

SG @ 20°C

1.10 g/cm<sup>3</sup> (20°C)

Water solubility

Nearly completely water soluble

pH

> 12.0
